WHAT IS THE MURAL CONTEST?

Over the next six years, the NASA Lifelines Mural Contest will engage local artists and communities to create murals in cities around the world that shed light on the ways satellite data and tools are helping communities become more resilient. From disaster preparedness and response to clean drinking water availability to pandemic preparedness, communities are using Earth science to inform local decision making. In partnership with local artists and leaders, these murals showcase communities and humanitarians at the forefront of innovation.

PROGRAM OCCURRENCE

EVERY YEAR

TIME OF YEAR

SUMMER

UPCOMING LOCATIONS

D.C., DET, NASH, NOLA, STL

DEADLINE FOR '24 APPLICANTS

FEBRUARY 15, 2024

WHAT IS THE GOAL?

The contest aims to make Earth science accessible and impactful by creatively communicating its benefits while centering around our most vulnerable communities.

WHO SHOULD GET INVOLVED?

Local artists, community organizations, municipal governments, local property owners and passionate community members!

WHY IT MATTERS?

Art is a powerful and impactful storytelling mechanism that can highlight powerful stories and the local voices behind them to make science more accessible.
